

HYBRID H2 AIR WASHER

HYBRID H2 AIR WASHER is the only solution to remove the fine dust, various bacteria and bad smell furthermore, functional a humidifier.

(No Chemi)

It makes a hydrogen water from origin water without any chemicals.

Sterilization

Micro dust

Add Humidification

Refresh

Take bad smell out

SMART

It's a SMART with 5 main functional.

HYBRID H2 AIR WASHER Features

HYBRID H2 AIR WASHER is SMART!

Chemical-free : Generation of sterilizing hydrogen water from pure water without using chemicals
 Wireless : Convenient to use with its wireless charging system
 Multi-functional : One spray with five functions of sterilization, air freshening, deodorization, moisturizing, and humidification

Easy control with the touch-screen display

Running time 1 hour with charging a 1 hour

Continuous spray with a strong motor pump and an ultra-fine nozzle

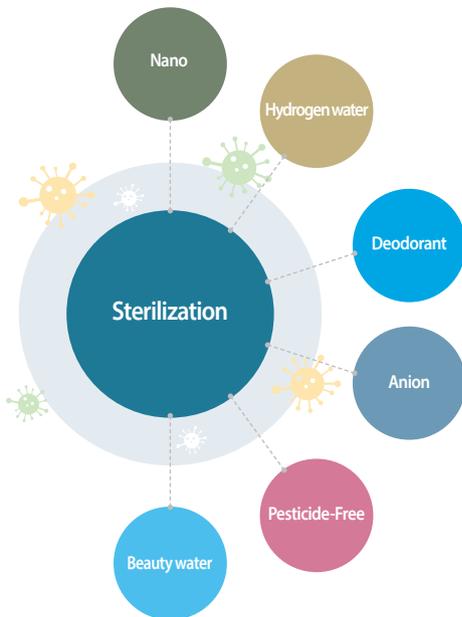

High concentration hydrogen water generated using an especially designed electrolyzer

HYBRID H2 AIR WASHER

Difference

Sterilization Hydrogen water has a sterilizing power(x2,000) than ozone with creates a OH

Nano Maximized a sterilizing and antioxidants power by decomposition as 5 Nano bubble has patented electrolyzer itself

Hydrogen water More grow up 30% of plant to creates a high density hydrogen water by electrolysis

Deodorant Remove a bed smell and various bacteria by hydrogen sterilizing water

Pesticide-Free 100% remove a pesticide within 3 minutes by hydrogen sterilizing water

HYBRID H2 AIR WASHER

Specifications

Product Name	HYBRID H2 AIR WASHER
Model No	PN-1500
Power supply	DC 24V / 1A (Rechargeable)
Dimension	292x 112 x 228 mm)
Weight	820g
Capacity	1L

HYBRID H2 AIR WASHER

Usage

For your living space to sterile and deodorant

Remove a bad smell in your clothes has odorless and colorless by hydrogen water

Effect

This sterilizing hydrogen water can remove such as ammonia and triethylamine (like stinky cheese) approximately 98% within 30 minutes created by H₂CO and OH⁻ included anion(5,400/cc).

BIT (be general deodorant product) damage to lung so that it might lose a viability of lung cells as per amount of input

- By Professor Jong-han Im, School of Medicine of Inha University -

“Quaternary ammonium chloride found in a number of deodorizers is reported to have the ability to damage the epithelial cells of lungs when inhaled.”
 “The Environmental Working Group (EWG) in the United States rated 26 Air Wick products and 9 Febreze products as F, the lowest grade in terms of safety. This means that they have harmful effects to respiratory and reproductive systems.”

As of April 4, 2016, 239 people were confirmed to have died due to humidifier sterilizers, and 1,528 people were reported to have been damaged by them. The toxicity of PHMG in sterilizers was estimated at 2,500 (a value of 1 or higher is considered dangerous). Harmful chemicals, such as PHMG (humidifier sterilizers), CMIT, and MIT, can be found in 320 kinds of biocides in the domestic market.
